

Setting up the Python environment and libraries

Code:

```
import ipywidgets as widgets
from IPython.display import display
slider=widgets.IntSlider(value=50,min=0,max=100,step=1,description='Value:')
output=widgets.Output()
def on_value_change(change):
    output.clear_output()
    with output:
        print(f'Slider value is {change["new"]}')
slider.observe(on_value_change, names='value')
display(slider,output)
```

Output:
